CQRS, Event Driven architecture, Solution architect, GIT, Grafana.

Experience

OCTOBER 2022

Senior Developer – Locaweb - Wake - São Paulo

Working as a senior developer, focused on digital marketing products. Designed and maintained systems to support intelligent campaign delivery, cross-platform integrations, and dynamic personalized templates. Mainly using .NET Core, React, Angular, NodeJs , C#, Python, JavaScript, HTML, CSS, SQL, NoSQL, AWS. Highlights:

- Defined the modeling and architecture of new products using cutting-edge technologies;
- Stabilized and optimized legacy systems to sustain the business until full migration;
- Planned and managed features for dynamic creation of humanized marketing templates.
- Built a robust messaging flow to handle a high volume of messages while reducing processing overhead and data loss;

DECEMBER 2016 - MARCH 2022

Senior Developer – Social Miner - São Paulo

Worked on the development of scalable web applications, collaborating closely with Product, Engineering, Marketing, and Customer Care teams. Built and integrated APIs, developed microservices and responsive interfaces. Mainly using .NET, Angular, NodeJs, C#, JavaScript, HTML, CSS, SQL, MongoDB, Elastic Search, Kafka, Redis, AWS, RESTful, Web Services, Grafana e NoSQL. Highlights:

- Delivered high-performance, robust systems that supported critical business operations;
- Developed and integrated microservices alongside a legacy monolithic architecture, aiding in architectural evolution;

- Founded and sustained a technical support area from scratch to handle internal operational demands and shield the development team from interruptions, enabling full focus on strategic deliveries;

FEBRUARY 2013

Freelancer Full-Stack Developer – Code Solutions

Worked as a developer in the company's software factory, contributing to various custom projects from requirements gathering through delivery and support. Developed corporate web applications, internal tools, and cross-platform integrations, with a strong focus on maintainability, code reuse, and performance. Using .NET, .NET Core, React, Angular, NodeJs, C#, Java, Python, JavaScript, typescript, HTML, CSS, SQL, RabbitMQ, MongoDB, Elastic Search, Kafka, Redis, Azure, Azure DevOps, AWS, Docker, Kubernetes, Rancher, RESTful, Web Services, Microsoft TFS, GIT, Grafana e NoSQL. Highlights:

- Delivered custom-built solutions for clients from different industries with speed and technical quality;
- Helped refactor legacy systems, reducing technical debt and improving maintainability;
- Collaborated in multidisciplinary teams within a factory model, contributing across multiple stages of the software development lifecycle;
- Supported standardization of architecture and versioning practices across concurrent projects;

Education

JANUARY 2013

UNASP São Paulo, Bachelor's in Computer Science
